To Whom It May Concern:

My name is Dennis Cecil. Robinson, and I am a Registered General Osteopath (Manual Practice) and Doctor of Naprapathic Medicine (Connective Tissue Specialist). I practice Manual Osteopathy and Natural Medicine in Toronto, Ontario. As a practitioner, I have spent many years treating patients, who suffer from acute and chronic pain due to neuromuscular pain and inflammation.. I have a wide variety of treatment methods to help my patients including Osteopathic and Naprapathic Manual Therapy, Bio-mesoderm (Micro-injections), individually and in combination with various therapeutic modalities of physical medicine such as ultrasound, TENS, and cold (low level) laser therapy. The results in dealing with severe cases of chronic pain and neuromuscular conditions were mixed.

A Naprapathic Physician practices Neuromyology, which is a joining of applied neurology and applied muscle physiology (connective tissue medicine). The use of Cold Lasers as been a part of my practice for over 10 years. In that time, I have used Cold (Low Level) Lasers produced by different companies. The results have been varying.

In the fall of this year (2009), I introduce the Photonic and Laser Therapy Program, LEP2000, with Doctors Salanskys' Protocols, to my practice. and the results were dramatic, the efficacy of the therapeutic programs in my clinic has dramatically increased. LEP2000 is exceptionally effective in the treatment of a broad variety of musculoskeletal and neuromuscular conditions including exigent cases of disc herniations, sciatica, back pain, "frozen shoulder" syndrome, carpal tunnel syndrome, myofascial pain, and inflammatory arthritic pain in joints.

I have found that the LEP2000 produces remarkable, immediate pain relief and patients have rapidly recovered normal functions. Patients, who complained of sleeplessness because of chronic pain, are now having better sleep after treatments with the LEP2000. This has also led to patients having been able to gradually reduce and even discontinue their dependence on pain medications.

The LEP2000 (Low Energy Photon Technology) is truly unique instrument, Doctors'. Salansky's innovative technology and protocols resulted in significant pain relief for many of my patients and even to a full recovery from neurological symptoms and manifestations. The LEP2000 has speeds pain relief and recoveries from neurological symptoms such as paresthesia, "pins and needles" and numbness have taken place.

The LEP2000 demonstrates amazing healing effects, and I am a convinced that the LEP2000 Photonic and Laser Therapy with Doctors Salanskys' Protocols, is a real breakthrough therapy and should be part of every Osteopathic and Naprapathic therapy program and in every medical office that practices rehabilitation medicine. The treatment has absolutely no side effects and is easy to apply. It has been especially satisfying for patients who attained immediate relief in the cases that this therapy was included.

The LEP2000 is easy to operate, there is no need to calculate laser dosages or manually enter any optical parameters. I can tell you from my personal experience that the LEP2000 therapy program is not only an excellent practice enhancer and but produces a stream of “word of mouth” referrals, my practice has more than doubled because of the pain free results my patients are experiencing..

Should any medical, osteopathic, naprapathic or chiropractic professional be interested in learning more about LEP2000 Photonic and Laser Therapy System, please call my office at (647) 986-8252.

Sincerely,

Dennis Cecil Robinson
Osteopathic and Naprapathic Physician
